Anadromous Water Catalog Number of Waterway 191-20-11500

Name of Waterway PEACOCK CR. USGS name _____ Local name X

Addition X Deletion _____ Correction _____ Backup Information _____

For Office Use

Nomination # <u>94 160</u>	<u>Samuel Hughes</u>	<u>11-1-93</u>
Revision Year: <u>'94</u>	Regional Supervisor	Date
Revision to: Atlas _____ Catalog _____	<u>ED Weiner</u>	<u>12/22/93</u>
Both <u>X</u>	<u>Z. Irone</u>	<u>1/6/94</u>
Revision Code: <u>A-2</u>	Drafted	Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
<u>coho salmon</u>	<u>5/19/93</u>		<u>30+X</u>		<u>X</u>
<u>DV</u>			<u>X</u>		

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Foot survey of stream during forest practices work. Stream was hand trapped in 3 locations (below logging road culvert and 2 locations above culvert [upstream]). All locations produced large 3-5" coho smolts as well as coho fry. Dolly Varden fingerlings (4-5" long) were also captured at each site. A small trib - enters the east side of the creek - above the road & paralleling it....flowing 1500' east to west. Coho fry/smolt + DV were also captured in it. This trib enters the old cutting unit #6. SITE 1 8 SMOLT NUMEROUS FRY COHO. SITE 2 12 COHO SMOLT. SITE 3 6-7 SMOLT & NUMEROUS FRY + ADULTY
